

JBG Portfolio Growth Engine

A Capability-Driven Capital & Resource Allocation Strategy

Prepared by: Business Strategy Associate

August 2026

Strategic Context & The Core Challenge

Solving Capital & Bandwidth Constraints via Structured Funneling

The Bottleneck: Resource Dispersion

JBG footprints across Software, Solar, and HR represent high-growth vectors, but decentralized capital allocations dilute overall Group impact.

1. Sourced Pipeline Saturation

Over 20+ opportunities compete for capital simultaneously, leading to decision paralysis.

2. Resource & Bandwidth Limits

Strict bottlenecks in software engineering headcount, management oversight, and investable cash.

3. Subjective Bias in Budgeting

Historical capital allocations influenced by subjective preference rather than hard commercial metrics.

The Solution: The Growth Funnel

Establish a standardized pipeline filter that screens opportunities for strategic alignment, capability fit, and economics before scaling funding.

1 Phase 1: Diagnose Core Health

Audit cost structures, current client margins, and developer capacity to establish baseline.

2 Phase 2: Scorecard Prioritization

Rank opportunities across 8 weighted market attractiveness and capability fit factors.

3 Phase 3: Validate Market Pilots

Deploy low-code B2B MVPs to test customer demand and willingness to pay.

Strategic Focus

By filtering proposals through an objective funnel, JBG avoids capital dilution and ensures management focuses on the **highest-yield initiatives first**.

Assessing Existing Business Lines

Establishing Base Core Performance and Low-Risk Growth Adjacencies

JCS (Technology)

IT Consulting Core

Provides custom software builds. Pivots custom dev contracts to international cloud managed service retainers to secure higher margins.

IT Managed Services

Nature Grid (Energy)

Solar Install Core

Installs residential solar arrays. Moves physical install capacity upmarket to larger C&I contracts and recurring maintenance O&M service agreements.

C&I Solar & O&M

Aequalis (HR)

Workforce Solutions

Provides recruitment searches. Expands transactional placement into specialized tech contract staffing retainers to smooth income cycles.

Contract Staffing

Ventures

New Ventures

Incubates emerging tech. Harvests common consulting code libraries from JCS to build and productize reusable SaaS templates and integration plug-ins.

Scalable SaaS IP

Strategic Alignment

Diagnosing each core unit establishes a solid foundation for growth, converting **transactional, low-margin income** into **stable, predictable cash flows**.

Strategic Lenses for Growth Sourcing

Four Strategic Vectors to Identify Opportunity Pools

1. Markets (Where)

Target geographic expansion in regions with active pipelines: Tier-1/2 Indian hubs for solar deployments, and Middle East & Southeast Asian corridors for IT managed services.

Target Geography

2. Segments (Who)

Pivot client portfolios upmarket. Move away from low-margin, high-churn SMB accounts to Mid-Market corporate profiles and B2B Enterprise accounts where contract values justify customized delivery.

Customer Profiles

3. Models (How)

Transition from transactional models (one-off custom builds, single placement fee, panel installation fee) to recurring contracts (subscriptions, monthly retainers, O&M service agreements).

Contract Structure

4. Capabilities (What)

Exploit cross-business synergies. Combine JCS software engineering with Aequalis client networks (to distribute HR SaaS) and Nature Grid site data (to power energy management dashboards).

Synergy IP

Growth Strategy

By applying these four strategic lenses, JBG systematically identifies high-probability opportunities that **leverage existing group relationships and capabilities**.

The Opportunity Prioritization Scorecard

An Objective Weighted Metric System to Allocate Capital

Market Potential (40%)

- **Market Attractiveness (20%):** Scope addressable TAM/SAM, historical and projected CAGR, and regional macro tailwinds.
- **Revenue Potential (20%):** Validate customer willingness to pay recurring premiums, lifetime value (LTV), and pricing power.

Scale Drivers

Strategic Fit (30%)

- **JBG Capability Fit (15%):** Maximize direct reuse of existing databases, code libraries, sales networks, or physical sites.
- **Strategic Alignment (15%):** Ensure long-term alignment with clean tech/digital vision and JBG brand equity.

Synergy Drivers

Feasibility (20%)

- **Competitive Intensity (10%):** Map competitor density, pricing commoditization, and barriers to building differentiation.
- **Ease of Execution (10%):** Scope software development time-to-market, regulatory barriers, and team skills.

Execution Drivers

Risk & Capital (10%)

- **Capital Efficiency (5%):** Minimize upfront Capex requirements and cash payback timeline.
- **Risk Mitigation (5%):** Hedge operational liabilities, regulatory policy changes, and vendor dependencies.

Control Drivers

Prioritizer Tool

We map all JBG candidate initiatives against this scorecard. You can adjust the weights and view ranked results live inside our **Prioritizer Dashboard**.

Cross-Business Synergy #1: Recruitment SaaS

Proprietary AI Product Built by JCS, Distributed by Aequalis

The Synergy Pool

Core Leverage

- **Aequalis enterprise database:** Immediate warm distribution to 100+ active recruitment clients.
- **JCS engineering team:** Internal bandwidth to build and own proprietary IP.
- **Domain workflow insights:** Sourcing expertise used to design the resume matching algorithms.

IP Ownership

Own vs. Buy Solution

- **Own the software IP:** Pivot Aequalis from a software-purchasing customer to a proprietary software owner.
- **B2B SaaS product:** License the screening software directly to B2B clients on monthly subscriptions.
- **AI-resume screening:** Vets high-volume candidate files against job listings in seconds.

Economics

Target Performance

> 4.0x

LTV : CAC RATIO

High margins enabled by using Aequalis's direct customer network, bypassing digital ad spend.

Strategic Impact

Pivoting from standard hiring fees to owning the software stack converts Jithvar into a **scalable, high-margin HR technology vendor**.

Cross-Business Synergy #2: Solar Telemetry SaaS

Unlocking Recurring Cash Flows from Nature Grid Solar Projects

The Synergy Pool

Core Leverage

- **Physical Installations footprint:** Nature Grid's physical C&I installations act as our proprietary hardware channels.
- **Cloud telemetry software:** JCS builds the software stack and database metrics.
- **Ongoing client logs:** Captures critical solar generation and carbon credits data.

IP Ownership

Own the Solar Stack

- **Proprietary Energy Dashboard:** Jithvar owns the software product rather than using general dashboards.
- **O&M service retainer contracts:** Combines digital tracking with physical O&M team contracts.
- **Predictive degradation alerts:** Software warns clients before energy outputs drop.

Economics

Target Performance

+30%

CUSTOMER LTV GROWTH

Layering software diagnostics adds high-margin recurring cash flows to one-off physical solar builds.

Strategic Impact

Converts a capital-heavy panel installation business into an **integrated energy service provider**, securing long-term O&M customer contracts.

Synergy #3: Productizing Consulting

Transitioning JCS from Custom Contracts to Scale Software

The Legacy Model (BEFORE)

20% Margin

Tailored Services ("Custom Tailor"): Every client project requires unique, from-scratch software builds, locking developer resources.

- Billable hours directly limit revenue scalability and growth speed.
- Long sales cycles and custom scoping delay project kickoffs.
- Higher delivery risk due to custom code maintenance liabilities.

The Productized Strategy (AFTER)

45%+ Margin

Modular Software Assets ("Ready-to-Wear"): Build proprietary, reusable integration templates (Salesforce, CRM, APIs) owned by Jithvar.

- Decouples group revenue from engineering headcount limitations.
- Accelerated time-to-value for B2B clients using standardized builds.
- Converts low-margin services into high-margin proprietary software licensing.

Strategic Impact

Transitioning only 30% of JCS resources to template-based delivery yields an estimated **15% increase in bottom-line EBITDA** within the first year of integration.

The Investment Research Agenda

Five Strategic Intelligence Buckets to Conduct Due Diligence

1. Market

Focus: Validate addressable TAM/SAM, segment CAGRs, and regional policy trends (e.g. net-metering laws).

Gate: TAM > \$500M; segment CAGR > 15%.

Size Gate

2. Customer

Focus: Run value-in-use validation and budget willingness to pay to map customer pain points.

Gate: Complete 30+ discovery interviews.

Discovery

3. Competitor

Focus: Map competitor pricing models, features, and market share density to identify gaps.

Gate: Clear JBG differentiation moat defined.

Market Moat

4. Capability

Focus: Audit developer bandwidth, sales experience, and hiring timelines for new ventures.

Gate: Core team workload capped < 85%.

Feasibility

5. Economics

Focus: Project LTV, CAC, payback cycles, and initial working capital/Capex demands.

Gate: LTV:CAC > 3.0x; Payback < 12 months.

Finance Gate

Research Agenda

Each gate acts as a hard filter. Ideas failing any validation threshold are killed early to **preserve capital and operational resources**.

Digital Marketing & Sales Enablement

Unified B2B Demand Generation and Lead Allocation

Inbound Demand Generation (Marketing Pull)

Lead Generation

Build high-authority, organic customer acquisition funnels that attract corporate decision makers:

- **Authority Whitepapers:** Publish research reports detailing solar paybacks and recruiting analytics.
- **Online Estimators:** Launch public ROI calculators (e.g. Solar Savings Dashboard) to generate inbound leads.
- **CRM Lead Scoring:** Deploy automated workflows to qualify and score leads before routing to sales agents.

Unified B2B Sales Playbook (Sales Push)

Cross-Selling

Maximize direct sales coverage and encourage account sharing across different business units:

- **Cross-BU Training:** Educate IT sales teams and HR recruitment reps on the full JBG portfolio catalog.
- **Lead Spotting Audits:** Recruiters spot IT developer capacity gaps; IT consultants identify recruiter bottlenecks.
- **Shared Commissions:** Unify client referral incentives to reward cross-selling success.

Sales Synergy

Unifying client onboarding across units ensures that a new solar C&I customer can be cross-pitched **IT consulting integrations** and **tech contract staffing retainers**.

First 90 Days Execution Timeline

Phased Implementation Schedule from Diagnostics to Pilot Validation

Days 1–30

Phase 1: Diagnose

- **Operational Audit:** Review margin profiles, revenue concentration risks, and client dependencies across JCS, Nature Grid, and Aequalis.
- **System Baseline:** Deploy the Group Business Health Dashboard to monitor cash conversion cycles.
- **Bandwidth check:** Audit developer workloads and capacity.

Operational Audit

Days 31–60

Phase 2: Discover

- **Idea Sourcing:** Gather growth proposals from all business units into a central repository.
- **Matrix Scoring:** Run opportunities through the 8-factor prioritization scorecard.
- **Portfolio Selection:** Pick the top 3 synergetic pilots for development.

Pipeline Prioritizer

Days 61–90

Phase 3: Validate

- **Low-Code Prototyping:** Launch mockups and B2B landing pages to test interest.
- **Customer Validation:** Conduct 30+ discovery interviews with target buyers.
- **Pre-Sales:** Secure early letter-of-intent (LOI) signings from warm trial accounts.

Market Verification

Roadmap Milestones

Execution is staged to protect cash reserves. We validate **demand and client pricing** before committing engineering assets or scaling dev hiring.

Governance & Success Metrics

Three Levels of KPI Tracking to Ensure Capital Discipline

ROIC

GROUP HEALTH

- **Revenue growth %:** Target sustainable portfolio growth.
- **EBITDA margin expansion:** Monitor unit margins.
- **ROIC:** Maximize group return on invested capital.

Portfolio Gate

> 3.0x

LTV : CAC

- **LTV:CAC ratio:** Enforce unit economic viability standards.
- **Payback cycle:** Target cash payback in < 12 months.
- **Churn Rate:** Monitor subscription cancellations.

Commercial Gate

> 70%

EARLY-KILLED IDEAS

- **Validation velocity:** Track time to terminate unviable pilots.
- **Fail-fast rate:** Terminate > 70% of ideas at research gates to preserve capital.

Governance Gate

Corporate Discipline

Enforcing strict governance ensures that JBG is dynamic yet disciplined, **funding winners** and **stopping losers** before capital exhaustion.
