

JITHVAR BUSINESS GROUP

JBG BUSINESS CHALLENGE

JBG Business Fellowship Program | IIM Rohtak

Jithvar Business Group (JBG) is a growing group of businesses and initiatives spanning technology, consulting, renewable energy, recruitment and other emerging opportunities.

1. JBG Business Fellowship Program

The Jithvar Business Group (JBG) Business Fellowship Program is a live business-learning and project program designed to give selected management students practical exposure to real-world business challenges.

Fellows may work on live projects across Jithvar Business Group, its group companies and selected JBG clients. Depending on their capabilities and project requirements, fellows may contribute to:

- Business and market research
- Strategy and consulting
- Digital marketing and growth
- Sales and business development
- Market expansion and competitive intelligence
- Product and business research
- Business operations
- Policy and process development
- New business and venture research
- Client projects

The program is intentionally designed to go beyond conventional internships. Fellows will be expected to research, analyse, develop recommendations and contribute to the execution of real business initiatives.

The Fellowship also provides JBG with an opportunity to identify high-potential management talent for future project, consulting, employment and business opportunities.

2. Jithvar Business Group — Business Portfolio

Jithvar Business Group (JBG) is a diversified business group with interests across technology, consulting, renewable energy, recruitment and emerging business ventures. The Group operates through multiple businesses and initiatives, each addressing different markets and business needs.

Jithvar Consultancy Services

Technology, Consulting & Digital Solutions

Jithvar Consultancy Services focuses on technology consulting, software and application development, ERP/CRM solutions, digital transformation and digital business solutions for businesses and organisations.

Nature Grid Energy

Renewable Energy & Sustainable Technology

Nature Grid Energy operates in the renewable energy sector, with a focus on solar energy solutions, including solar installation, maintenance, commercial and industrial solar projects and related energy solutions.

Aequalis Global

Executive Search, Recruitment & Workforce Solutions

Aequalis Global provides executive search, recruitment, bulk hiring, contract staffing, IT recruitment and related workforce solutions across selected domestic and international markets.

New Ventures & Strategic Initiatives

Technology Products, SaaS & Emerging Businesses

JBG is also developing and evaluating new technology products, SaaS platforms, business ventures and other strategic initiatives. Fellows may have opportunities to participate in research and strategy assignments related to these initiatives.

The Fellowship is not restricted to a single company or industry. Depending on business requirements, project availability and individual capabilities, selected fellows may work with one or more JBG businesses or on projects involving JBG clients. This provides fellows with exposure to different industries, business models, customer segments and management challenges.

3. About the JBG Business Challenge

The JBG Business Challenge is the next stage of the selection process for the JBG Business Fellowship Program.

The challenge is not intended to test knowledge of a particular subject or framework. Instead, it is designed to understand how you think, analyse an unfamiliar problem, conduct research, identify opportunities and turn your analysis into practical business recommendations.

4. The Business Situation

Jithvar Business Group is developing a portfolio of businesses across multiple industries. The Group wants to strengthen the growth of its existing businesses while identifying new opportunities that can create meaningful long-term value.

The management team wants to build a more structured approach to deciding where to invest its time, people and resources. It therefore needs a clear way to understand its businesses, identify opportunities, prioritise them and translate priorities into action.

5. Your Assignment

Assume that you have joined the management team of Jithvar Business Group as a Business Strategy Associate. Prepare a concise recommendation for the Group management team on how JBG should identify and prioritise its next growth opportunities.

- How would you assess the current businesses and identify their most important growth opportunities?
- What factors would you use to prioritise one opportunity over another?

- Which markets, customer segments, business models or capabilities should JBG investigate further?
- How can digital marketing, sales and business development support the Group's growth?
- What research or information would you need before making major investment decisions?
- What would you recommend JBG focus on during the first 90 days?
- How would you measure whether the recommended strategy is working?

6. What We Expect

There is no single correct answer. We are primarily interested in the quality of your thinking and the logic behind your recommendations.

- Clear understanding of the problem
- Relevant and credible research
- Structured and analytical thinking
- Commercial and strategic judgement
- Practical and actionable recommendations
- Ability to prioritise rather than list every possible idea
- Clear assumptions where information is unavailable
- Concise and professional communication

7. Submission Requirements

Executive Summary: Maximum 1 page summarising your key recommendation.

Main Presentation: Maximum 12 slides.

Supporting Analysis: Optional; maximum 5 additional pages if required.

File Format: PDF preferred.

Time Available: 72 hours from the official release of the challenge.

8. Research & AI Usage

You may use publicly available information, research databases, spreadsheets, presentation tools and AI-based tools while preparing your submission.

However, the final submission must reflect your own analysis, judgement and recommendations. You should be able to explain and defend the assumptions, research and recommendations included in your submission. Generic or unsupported AI-generated content is unlikely to perform well.

9. Evaluation

Evaluation Area	Weight
Problem understanding	10%
Research and evidence	10%
Analytical thinking	15%
Strategic thinking	20%
Commercial/business understanding	15%
Opportunity identification and creativity	10%
Practicality and execution	10%
Communication and presentation	5%
Use of data and assumptions	5%

The Business Challenge is one stage of the selection process. Candidates may be invited to a subsequent group exercise and/or personal interaction based on the quality of their submission.

10. Important Note

The challenge is intentionally broad because the Fellowship is not limited to one functional area or one JBG company. Selected fellows may contribute to different JBG businesses and client projects based on their strengths, interests and business requirements.
